

DAILY PRACTICE: DAY 20260623 - WILDLIFE & CONSERVATION*(Level: Reading A2 - Writing A1)*

Student Name:

Time Allowed: 50 mins

WARM-UP / KHỞI ĐỘNG**Answer the following questions in Vietnamese or English:**

1. What is your favorite wild animal? (Con vật hoang dã yêu thích của bạn là gì?)
2. Why do you think some animals are in danger of extinction? (Tại sao bạn nghĩ một số loài động vật có nguy cơ tuyệt chủng?)
3. What can we do to protect wildlife? (Chúng ta có thể làm gì để bảo vệ động vật hoang dã?)

I. READING PASSAGE**Wild Cat Is Back from Near Extinction**

A species of wild cat in Europe that was almost extinct, or about to disappear, over 20 years ago has returned.

Last week, the International Union for Conservation of Nature (IUCN) declared that the Iberian lynx is no longer an endangered species. Native to Spain and Portugal, the wild cats are medium-sized with different shades of brown. They have pointed ears and facial hair that looks like a beard.

In 2001, there were only 62 adult Iberian lynx. The low numbers led to emergency efforts to save the animals. Experts then helped bring males and females together for reproduction and started protection projects. Other efforts included restoring their natural environments, including dense forests and grasslands. By 2023, the IUCN said its latest count shows more than 2,000 wild cats, including adults and younger ones.

“It’s really (a) huge success, an exponential increase in the population size,” Craig Hilton-Taylor told The Associated Press. He is head of the IUCN Red List. The Red List maintains information on animals and plants that face the risk of extinction.

The Iberian lynx’s disappearance was closely linked to that of its main food source -- the European rabbit. Other reasons are damage to its habitats and human activity. One of the keys to their recovery has been the attention given to the rabbit population. The rabbits had been affected by changes in agricultural production. And their recovery has led to a continuous increase in the lynx population, Hilton-Taylor said.

Francisco Javier Salcedo Ortiz is with the European Union’s LIFE Lynx-Connect project. He called it “the greatest recovery of a cat species ever achieved through conservation.” Ortiz said it was the result of partnerships among public bodies, scientific communities, non-profit organizations, businesses, and people, like local landowners, farmers, gamekeepers and hunters.

IUCN has also worked with local communities to teach people about the importance of the Iberian lynx in nature. This has helped to reduce animal deaths due to accidents or illegal hunting. In addition, Hilton-Taylor said, farmers receive money if a lynx kills any of their animals.

Since 2010, more than 400 Iberian lynx have been reintroduced to parts of Portugal and Spain. Now, their habitat includes at least 3,320 square kilometers. This is an increase from 449 square kilometers in 2005. “We have to consider every single thing before releasing a lynx, and every four years or so we revise the

protocols,” said Ramón Pérez de Ayala. He is the World Wildlife Fund’s Spain species project manager. WWF is one of the organizations involved in the project.

While the latest Red List update offers hope for other species in the same situation, Hilton-Taylor warns that the lynx is not out of danger just yet. The biggest uncertainty is what will happen to rabbits. They are often affected by viruses and other diseases. Hilton-Taylor said, “We also worried about issues with climate change, how the habitat will respond to climate change, especially the increasing impact of fires, as we’ve seen in the Mediterranean in the last year or two.”

II. IELTS READING QUESTIONS (13 QUESTIONS)

Questions 1–5: Do the following statements agree with the information given in the Reading Passage? Write:

1. Over twenty years ago, the Iberian lynx was in danger of disappearing completely.
2. The disappearance of wild rabbits made it easier for the Iberian lynx to find food.
3. The Spanish government spent millions of euros on the captive breeding programs.
4. By 2023, the population of the Iberian lynx reached over 2,000 cats in the wild.
5. The Iberian lynx is now completely safe from all environmental threats. (*)

Questions 6–9: Complete the sentences below. Choose NO MORE THAN TWO WORDS from the passage for each answer.

6. The Iberian lynx did not have enough natural , which contributed to their decline.
7. The low population numbers led to to rescue the wild cats.
8. According to the latest count, the lynx population is now over .
9. Since 2010, the conservationists have more than 400 lynx to Spain and Portugal. (*)

Questions 10–13: Choose the correct letter, A, B, C, or D.

10. What was one major reason for the disappearance of the Iberian lynx?
 - A. The loss of their main food source, the European rabbit.
 - B. The release of more than 400 wild cats.
 - C. A lack of pointed ears and facial hair.
 - D. The increasing numbers of Gamekeepers.
11. How did experts help the lynx population recover?
 - A. By keeping rabbits in safe breeding centers.
 - B. By bringing males and females together for reproduction.
 - C. By feeding them different kinds of vegetables.
 - D. By moving all of them to Spain.

12. What does Craig Hilton-Taylor say about the rabbits?
- A. They are completely safe from environmental changes.
 - B. They do not eat plants or grass.
 - C. They are often affected by viruses and other diseases.
 - D. They are not important for the survival of the lynx.

13. What is the main message of the reading passage?

III. QUESTIONS FOR GRAMMAR (30 QUESTIONS)

Questions 14–43: Complete the exercise.

14. In 2001, only 62 Iberian lynx _____ in the wild.
A. live B. lived C. was living D. are living
15. Yesterday, the conservation group _____ a new program to help endangered birds.
A. starts B. started C. was starting D. has started
16. Last year, researchers _____ more wild rabbits into the forest.
A. bring B. brought C. was bringing D. has brought
17. Long ago, many wild animals _____ in these Mediterranean grasslands.
A. roam B. roamed C. was roaming D. have roamed
18. Scientists _____ some cats in safe centers last decade to breed them.
A. keep B. kept C. keeping D. have kept
19. The lynx population _____ significantly after we protected the forests.
A. increases B. increased C. increasing D. has increased
20. Ten years ago, the wild rabbits _____ out quickly because of a disease.
A. die B. died C. dying D. have died
21. Last month, the government _____ a new law to preserve wildlife habitats.
A. passes B. passed C. was passing D. has passed
22. We _____ a beautiful wild cat during our trip to Spain last summer.
A. see B. saw C. seen D. was seeing
23. The researchers _____ the captive-bred animals back into the forest yesterday.
A. release B. released C. releasing D. releases
24. In 2002, the wild cats _____ not find enough food because rabbits were dying.
A. can B. could C. must D. should
25. We _____ protect wildlife, or many species will die out soon.
A. should B. could C. might D. were able to
26. Conservationists _____ build safe crossings under busy roads so animals can cross safely.
A. must B. could C. had to D. were

27. Iberian lynx _____ jump very high to catch birds and rabbits.
A. can B. should C. must D. had to
28. We _____ destroy forest habitats because wild animals live there.
A. should not B. could not C. did not D. must
29. Visitors _____ feed the wild animals in the national park; it is strictly prohibited.
A. must not B. should not C. could not D. don't have to
30. In the past, scientists _____ breed the wild cats in safety centers because their population was very small.
A. can B. must C. had to D. should
31. If you visit the conservation center, you _____ follow all the safety guidelines.
A. must B. could C. might D. would
32. Humans _____ prevent climate change to protect vulnerable species.
A. should B. could C. was able to D. might
33. Young animals in captivity _____ survive without the help of researchers.
A. cannot B. should not C. must not D. had not
34. The population of the cats was (A) very small in 2002, so researchers must (B) breed them in safety (C) centers to help (D) them.
35. We can (A) protect endangered (B) animals by destroy (C) their natural habitats (D).
36. Last week, the scientist explains (A) how the breeding (B) programs helped (C) the wildlife (D) recover.
37. Animals could (A) not survive (B) if they run (C) out of food (D).
38. Conservation groups (A) successful (B) released (C) ten lynx into the wild yesterday (D).
39. Humans should (A) to preserve (B) forests to prevent (C) species from dying (D) out.
40. The rabbits become (A) extinct (B) in that area because (C) of the spread of diseases (D).
41. We must not (A) to hunt (B) endangered animals because they are (C) at risk of extinction (D).
42. The decline (A) in the number of wild prey makes (B) it very difficult for the wild (C) cats to survive (D) last year.
43. Wildlife protectors (A) could (B) saved (C) the species because they acted (D) quickly. (*)

IV. QUESTIONS FOR WRITING (10 TASKS)

Task 1: Word Ordering (Sắp xếp từ thành câu hoàn chỉnh)

is / cat / Iberian lynx / the / an / endangered . →
.....

Answer:

Task 2: Word Ordering (Sắp xếp từ thành câu hoàn chỉnh)

must / protect / we / natural / habitats / their . →
.....

Answer:

Task 3: Word Ordering (Sắp xếp từ thành câu hoàn chỉnh)

wild rabbits / prey / main / are / the / of / lynx . →
.....

Answer:

Task 4: Word Ordering (Sắp xếp từ thành câu hoàn chỉnh)

many / animals / forest / in / the / live / wild . →
.....

Answer:

Task 5: Word Ordering (Sắp xếp từ thành câu hoàn chỉnh)

dinosaurs / out / millions / of / years / died / ago . →
.....

Answer:

Task 6: Sentence Completion (Hoàn thành câu)

Complete the sentence using the words "protect" and "wildlife": We should
.....

Answer:

Task 7: Sentence Completion (Hoàn thành câu)

Complete the sentence using the word "extinct": Many wild animals are
.....

Answer:

Task 8: Sentence Completion (Hoàn thành câu)

Complete the sentence using the word "survive": Animals need food to

Answer:

Task 9: Sentence Completion (Hoàn thành câu)

Complete the sentence using the words "preserve" and "forests": We must

Answer:

Task 10: (*) Sentence Completion (Hoàn thành câu)

Complete the sentence using the words "decline" and "prey": The population of lynx did not

Answer:
