

DAILY PRACTICE: DAY 20260626 - HISTORY OF INVENTIONS*(Level: Reading B1 - Writing A1)*

Student Name:

Time Allowed: 50 mins

WARM-UP / KHỞI ĐỘNG**Answer the following questions in Vietnamese or English:**

1. Bạn có thường xuyên đeo dây đai an toàn khi ngồi trên ô tô không? Vì sao việc này lại quan trọng?
2. Bạn có biết ai là người đã phát minh ra dây đai an toàn hiện đại không?
3. Theo bạn, một phát minh thành công cần có những yếu tố gì?

I. READING PASSAGE**Safety Science: The Stories Behind Seat Belts and Kevlar**

Most cars have seat belts as part of their equipment. Seat belts protect drivers and passengers in case of accident. They also reduce the effect of a crash on the body. Safety experts estimate that the restraining devices save thousands of lives a year in the United States alone. Worldwide, some experts, say the devices have protected up to a million people.

The first seat belt was said to have been created in the eighteen hundreds by George Cayley of England. He is remembered for many inventions, especially for early “flying machines.”

The United States first recognized the invention of an automobile seat belt in eighteen forty-nine. The government gave a patent to Edward J. Claghorn of New York City so that others would not copy his invention. Claghorn called the device a Safety-Belt. It was said to include hooks and other attachments for securing the person to a fixed object.

Other inventors followed with different versions of the seat belt. But more than one hundred years passed before the current, widely used seat belt was developed. It resulted from the work of a Swedish engineer, Nils Bohlin. His three-point, lap and shoulder seat belt first appeared on cars in Europe fifty years ago.

At the time, most safety belts in cars crossed the body over the abdomen. A buckle held the restraints in place. But the position of the buckle often caused severe injuries in bad crashes.

Nils Bohlin recognized that both the upper and lower body needed to be held securely in place. His invention contained a cloth strap that was placed across the chest and another strap across the hips. The design joined the straps next to the hip.

Volvo was the first automobile manufacturer to offer the modern seat belt as a permanent addition to its cars. It also provided use of Nils Bohlin’s design to other car-makers.

The Swedish engineer won many honors for his seat belt. He received a gold medal from the Royal Swedish Academy of Engineering Sciences in nineteen ninety-five. He died in Sweden in two thousand two.

II. IELTS READING QUESTIONS (13 QUESTIONS)

Questions 1–5: Do the following statements agree with the information given in the Reading Passage? Write:

1. Safety experts believe seat belts save thousands of lives annually in the United States.
2. George Cayley created the first seat belt in the nineteenth century.
3. Edward J. Claghorn was a government officer who gave patents to inventors.
4. Nils Bohlin's three-point seat belt was first used in cars in the United States.
5. Nils Bohlin received financial support from the Swedish government for his work. (*)

Questions 6–9: Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

6. Early seat belts in cars crossed the passenger's body over the .
7. Nils Bohlin designed a seat belt that secured both the body in place.
8. was the first car manufacturer to use the modern seat belt permanently.
9. In 1995, Nils Bohlin was awarded a by the Royal Swedish Academy. (*)

Questions 10–13: Choose the correct letter, A, B, or C.

10. What did safety experts note about early car seat belts with buckles?
A. They were very comfortable for long trips.
B. They could cause severe injuries during accidents.
C. They were too expensive for most people to buy.
11. Nils Bohlin's three-point seat belt design was unique because it:
A. used hooks to attach the person to a fixed object.
B. was made of bulletproof Kevlar material.
C. held both the chest and hips securely using two straps.
12. What does Volvo's action of providing Nils Bohlin's design to other car-makers suggest? (*)
A. Volvo wanted to help other companies make safer cars.
B. Volvo could not afford to manufacture seat belts.
C. The Swedish government forced Volvo to share the design.
13. Which of the following is the most suitable title for this passage? (*)

IV. QUESTIONS FOR WRITING (5 TASKS)

Task 1: Word Ordering (Sắp xếp từ thành câu hoàn chỉnh)

Rearrange the words to make a correct sentence: safe / seat belts / keep / in / us / cars / . Answer:

..... Answer:
.....

Answer:

Task 2: Sentence Completion (Hoàn thành câu)

Complete the sentences with your own information: 1. I always wear a seat belt when 2. Car safety is important because

Answer:

Answer:

Task 3: Translation (Dịch câu)

Translate the sentences from Vietnamese into English: 1. Kỹ sư người Thụy Điển đã phát minh ra dây đai an toàn mới. Answer:

..... 2. Chúng ta phải luôn luôn thắt dây an toàn trong ô tô. Answer:

Answer:

Answer:

Task 4: Short Description

Read the invention facts below and write two simple sentences to describe it: - Invention: Three-point seat belt - Inventor: Nils Bohlin (Swedish engineer) - Year: 1959 - Effect: Saves many lives Sentence 1:

Sentence 2:

Answer:

Answer:

Task 5: (*) Guided Email Invite (Viết email ngắn)

.....

.....

.....

.....

..... Subject:

.....

.....

.....

.....

.....

.....
