

DAILY PRACTICE: DAY 20260627 - WILDLIFE CONSERVATION*(Level: Reading B1 - Writing A1)*

Student Name:

Time Allowed: 50 mins

WARM-UP / KHỞI ĐỘNG**Trả lời ngắn gọn các câu hỏi sau bằng tiếng Việt hoặc tiếng Anh để bắt đầu bài học:**

1. Bạn biết gì về đất nước Zimbabwe và các loài động vật hoang dã ở đây? (What do you know about Zimbabwe and its wildlife?)
2. Theo bạn, hạn hán và biến đổi khí hậu ảnh hưởng thế nào đến động vật? (How do you think drought and climate change affect animals?)
3. "Poaching" (săn bắn trộm) nghĩa là gì và tại sao nó lại nguy hiểm? (What does 'poaching' mean and why is it dangerous?)

I. READING PASSAGE**Zimbabwe Moves 2,500 Wild Animals Due to Climate Change**

In Zimbabwe, officials have begun moving more than 2,500 wild animals from the south to the north.

This move is to rescue the animals from a severe lack of water caused by climate change. The lack of water, or drought, has now replaced illegal hunting, called poaching, as the biggest threat to wildlife.

Among the animals being moved are about 400 elephants, 2,000 impalas, 70 giraffes, 50 buffaloes, 50 wildebeest, 50 zebras, 50 elands, 10 lions, and a pack of 10 wild dogs.

Called "Project Rewild Zambezi," this is one of southern Africa's biggest live animal capture and relocation efforts.

What does such a huge effort look like?

A helicopter helps to round up thousands of impalas into a closed area. A mechanical device lifts medicated upside-down elephants into vehicles. Teams of rangers drive other animals into metal cages. Finally, a long line of trucks starts a journey of about 700 kilometers to take the animals to their new home.

It is the first time in 60 years that Zimbabwe has had such a mass movement of wildlife inside its borders.

Between 1958 and 1964, when the country was white-minority-ruled Rhodesia, more than 5,000 animals were moved in what was called "Operation Noah." That operation rescued wildlife from the rising water caused by building a large dam project on the Zambezi River. The dam created one of the world's largest man-made lakes, Lake Kariba.

This time, the lack of water has made it necessary to move wildlife. Tinashe Farawo is a spokesperson for the Zimbabwe National Parks and Wildlife Management Authority. He said the environment, or habitat, has become too dry from long periods of no rain. The park agency issued permits for the animals to be moved. He said this is to avoid "a disaster from happening."

"For years we have fought poaching and just as we are winning that war, climate change has emerged as the biggest threat to our wildlife," Farawo told The Associated Press.

He said, "Many of our parks are becoming overpopulated and there is little water or food. The animals end up destroying their own habitat." They become a danger to themselves and to neighboring human areas as they look for food. The result, he said, is a constant "conflict."

Another idea would be to reduce the number of animals. But conservation groups protest such killings. Farawo said that Zimbabwe last did this in 1987.

The effects of climate change on wildlife are not only happening in Zimbabwe. Across Africa, national parks are increasingly threatened by below-average rainfall and new building projects. These parks are home to wildlife such as lions, elephants, and buffaloes.

One of the new homes in Zimbabwe for the animals is Sapi Reserve. This privately-run reserve is east of Mana Pools National Park, a UNESCO World Heritage Site. It is known for its beautiful setting along the Zambezi River.

II. IELTS READING QUESTIONS (13 QUESTIONS)

Questions 1–5: Choose the correct letter, A, B, C, or D, for questions 1–5.

1. What is the primary reason for the current relocation of wild animals in Zimbabwe?
 - A. To protect them from illegal poachers who hunt for ivory.
 - B. To escape rising water levels caused by building a dam.
 - C. To save them from a severe lack of water and food due to climate change.
 - D. To move them to a zoo for public entertainment.
2. Which species represents the largest number of individual animals being relocated?
 - A. Elephants
 - B. Impalas
 - C. Giraffes
 - D. Lions
3. What was the purpose of "Operation Noah" between 1958 and 1964?
 - A. To transport animals to Sapi Reserve along the Zambezi River.
 - B. To rescue wildlife from rising waters caused by the Kariba Dam.
 - C. To capture poachers operating in the southern parts of the country.
 - D. To reduce the overpopulation of elephants in Zimbabwe's national parks.
4. According to Tinashe Farawo, how does overpopulation affect the animals' environment?
 - A. It helps the forest grow faster due to increased animal activity.
 - B. The animals end up destroying their own habitat because food and water are scarce.
 - C. It brings more tourists, who provide extra food for the animals.
 - D. It reduces conflict between humans and wild animals.

5. What can be inferred about the practice of "reducing the number of animals" (culling) in Zimbabwe? (*)
- A. It is actively supported by modern conservation groups.
 - B. It was a common method used every year after 1987.
 - C. It is an unpopular method that Zimbabwe has not used for several decades.
 - D. It is the only option left to protect national parks from overpopulation.

Questions 6–9: Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

6. The massive relocation project in Zimbabwe is officially named _____.
7. To capture and transport the animals, rangers use helicopters, metal cages, and a _____.
8. Zimbabwe last reduced the number of animals through culling in the year _____.
9. Sapi Reserve, one of the new homes for the animals, lies east of _____, which is a UNESCO World Heritage Site. (*)

Questions 10–13: Do the following statements agree with the information given in the reading passage? Write:

TRUE **if the statement agrees with the information**
FALSE **if the statement contradicts the information**
NOT GIVEN **if there is no information on this**

10. Climate change is now a bigger threat to Zimbabwe's wildlife than illegal hunting.
11. Operation Noah relocated fewer than 2,000 animals in total.
12. Sapi Reserve is managed directly by the Zimbabwe National Parks Authority.
13. Global warming is affecting national parks and wildlife in other African countries besides Zimbabwe. (*)

III. QUESTIONS FOR GRAMMAR (30 QUESTIONS)

Questions 14–23: Complete the sentences with the correct form of the verbs in brackets (Present Perfect or Past Simple).

14. Zimbabwe _____ (begin) its biggest animal relocation project last month.
15. Climate change _____ (become) the biggest threat to African wildlife in recent years.
16. In 1958, rangers _____ (start) Operation Noah to save animals from flooding.
17. Conservationists _____ (fight) poaching for decades, and they are still working hard today.
18. Last year, the drought _____ (cause) many rivers in the south to dry up.
19. The spokesperson _____ (just/announce) the successful transport of 400 elephants.
20. Zimbabwe _____ (not/cull) any national park animals since 1987.
21. During the 1960s, Lake Kariba _____ (fill) with water after the dam was built.
22. Many national parks in Africa _____ (suffer) from below-average rainfall recently.
23. A pack of wild dogs _____ (arrive) at Sapi Reserve two days ago, along with ten lions. (*)

Questions 24–33: Fill in the blanks with a relative pronoun (who, which, that, where, whose). Add commas where necessary to form correct non-defining relative clauses.

24. The helicopter _____ was used to round up the impalas flew very low.
25. Tinashe Farawo _____ is the spokesperson for the park authority gave an interview to the press.
26. Sapi Reserve _____ is located along the Zambezi River is a privately-run reserve.
27. The rangers _____ job is to protect the animals worked day and night during the relocation.
28. This is the park _____ many wild elephants live and seek food.
29. The dam _____ created Lake Kariba was constructed on the Zambezi River.
30. Conservation groups _____ protect wild animals protested against culling.
31. Rhodesia _____ was the old name of Zimbabwe was ruled by a white minority.
32. We visited the Sapi Reserve _____ we saw many giraffes and zebras.
33. The group of elephants _____ leaders were fitted with GPS trackers successfully reached their new home. (*)

Questions 34–43: Choose the correct contrast linker (while, whereas, by contrast, in contrast) to complete the sentences.

34. Southern parks are facing severe water shortages, _____ northern conservancies have more secure water sources.
35. In the past, poaching was the main threat to animals. Today, _____, climate change is the primary danger.
36. Elephants are transported using heavy machinery, _____ impalas are rounded up by helicopters.
37. Conservationists support rewilding projects, _____ they strongly protest culling.
38. Lake Kariba was created by a human-made dam, _____ Sapi Reserve is a natural wildlife area.
39. Zimbabwe began its relocation project in 2022. Operation Noah, _____, took place sixty years ago.
40. Lions are carnivores that hunt other animals, _____ elands are herbivores that eat grass.
41. Sapi Reserve is privately managed, _____ most other national parks are run by the government.
42. Poaching numbers have decreased in recent years. Water scarcity, _____, has risen significantly.
43. The adult elephants required heavy sedation during transport, _____ the baby elephants _____ easily moved without strong medication. (*)

IV. QUESTIONS FOR WRITING (5 TASKS)

Task 1: Word Ordering (Sắp xếp từ thành câu hoàn chỉnh)

Rearrange the words to form simple sentences:

a) animals / Zimbabwe / moving / is / wild / north / to / the.

Answer:

b) drought / is / a / threat / big / to / elephants.

Answer:

c) rangers / protect / parks / national / in / wildlife.

Answer:

Task 2: Sentence Completion (Hoàn thành câu)

Combine these sentences using "and", "but", or "because":

a) The park has little water. The animals destroy their habitat.

Answer:

b) Rangers want to save the giraffes. The journey is very long.

Answer:

c) Lions live in Sapi Reserve. Zebras live there too.

Answer:

Task 3: Short Description (Mô tả ngắn)

Write a short paragraph describing your favorite wild animal. Mention its name, what it looks like, and where it lives.

.....
.....
.....
.....

Task 4: Short Description (Mô tả ngắn)

Write a short paragraph describing a public park or garden in your town. What can people do there?

.....
.....
.....
.....

Task 5: Guided Email Invite (Viết email ngắn)

(*) Write a short message/email (40-50 words) to a friend, inviting them to go to a wildlife park next Saturday. Explain how you will travel there.

To: Subject:

.....
.....
.....
.....
