

DAILY PRACTICE: DAY 20260626 - HISTORY OF INVENTIONS

(Level: Reading B1 - Writing A1)

Student Name:

Time Allowed: 50 mins

WARM-UP / KHỞI ĐỘNG

Trả lời ngắn gọn các câu hỏi sau bằng tiếng Việt hoặc tiếng Anh trước khi đọc bài:

1. Bạn có thường xuyên đeo dây đai an toàn khi ngồi trên ô tô không? Vì sao việc này lại quan trọng?
2. Bạn có biết ai là người đã phát minh ra dây đai an toàn hiện đại không?
3. Theo bạn, một phát minh thành công cần có những yếu tố gì?

I. READING PASSAGE

Safety Science: The Stories Behind Seat Belts and Kevlar

(Adapted from VOA Special English, November 16, 2011)

Most cars have seat belts as part of their **equipment**. Seat belts protect drivers and passengers **in case of** accident. They also reduce the effect of a crash on the body. Safety experts **estimate** that the **restraining** devices save thousands of lives a year in the United States alone. Worldwide, some experts say the devices have protected up to a million people.

The first **seat belt** was said to have been created in the eighteen hundreds by George Cayley of England. He is remembered for many inventions, especially for early "flying machines."

The United States first recognized the invention of an automobile **seat belt** in eighteen forty-nine. The government gave a **patent** to Edward J. Claghorn of New York City so that others would not copy his invention. Claghorn called the device a Safety-Belt. It was said to include hooks and other **attachments** for securing the person to a **fixed** object.

Other inventors followed with different **versions** of the **seat belt**. But more than one hundred years passed before the current, widely used **seat belt** was developed. It resulted from the work of a Swedish engineer, Nils Bohlin. His **three-point, lap and shoulder seat belt** first appeared on cars in Europe fifty years ago.

At the time, most safety belts in cars crossed the body over the **abdomen**. A buckle held the restraints in place. But the position of the buckle often caused severe injuries in bad crashes.

Nils Bohlin recognized that both the upper and lower body needed to be held securely in place. His invention contained a cloth strap that was placed across the chest and another strap across the hips. The design joined the straps next to the hip.

Volvo was the first automobile manufacturer to offer the modern **seat belt** as a **permanent addition** to its cars. It also provided use of Nils Bohlin's design to other car-makers.

The Swedish engineer won many **honors** for his **seat belt**. He received a gold medal from the Royal Swedish **Academy** of Engineering Sciences in nineteen ninety-five. He died in Sweden in two thousand two.

II. IELTS READING QUESTIONS (13 QUESTIONS)

Questions 1–5: Do the following statements agree with the information given in the Reading Passage? Write TRUE, FALSE, or NOT GIVEN.

TRUE if the statement agrees with the information
FALSE if the statement contradicts the information
NOT GIVEN if there is no information on this

1. Safety experts believe seat belts save thousands of lives annually in the United States.
2. George Cayley created the first seat belt in the nineteenth century.
3. Edward J. Claghorn was a government officer who gave patents to inventors.
4. Nils Bohlin's three-point seat belt was first used in cars in the United States.
5. Nils Bohlin received financial support from the Swedish government for his work. (*)

Questions 6–9: Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

6. Early seat belts in cars crossed the passenger's body over the _____.
7. Nils Bohlin designed a seat belt that secured both the _____ body in place.
8. _____ was the first car manufacturer to use the modern seat belt permanently.
9. In 1995, Nils Bohlin was awarded a _____ by the Royal Swedish Academy. (*)

Questions 10–13: Choose the correct letter, A, B, or C.

10. What did safety experts note about early car seat belts with buckles?
A. They were very comfortable for long trips.
B. They could cause severe injuries during accidents.
C. They were too expensive for most people to buy.
11. Nils Bohlin's three-point seat belt design was unique because it:
A. used hooks to attach the person to a fixed object.
B. was made of bulletproof Kevlar material.
C. held both the chest and hips securely using two straps.
12. What does Volvo's action of providing Nils Bohlin's design to other car-makers suggest? (*)
A. Volvo wanted to help other companies make safer cars.
B. Volvo could not afford to manufacture seat belts.
C. The Swedish government forced Volvo to share the design.
13. Which of the following is the most suitable title for this passage? (*)
A. The History of the Automobile
B. How One Inventor Changed Car Safety Forever
C. Famous Engineers from Sweden

III. QUESTIONS FOR GRAMMAR (23 QUESTIONS)

Questions 14–18: Choose the correct option (A, B, or C) to complete each sentence.

14. Nils Bohlin _____ the modern seat belt for Volvo in 1959.
- A. has made
 - B. made
 - C. makes
15. Scientists _____ that the number of car accidents has fallen by 30% since 2000.
- A. estimated
 - B. have estimated
 - C. estimate
16. An inventor _____ a short film about inventions at the science fair last week.
- A. watches
 - B. has watched
 - C. was watched
17. Car safety technology _____ greatly since the 1960s.
- A. improved
 - B. has improved
 - C. was improved
18. Volvo _____ Nils Bohlin's design to other car-makers after 1959.
- A. launches
 - B. has launched
 - C. launched

Questions 19–23: Fill in the blank with the correct relative pronoun: who, which, that, where, or whose.

19. Nils Bohlin was the engineer _____ invented the modern three-point seat belt.
20. The seat belt was a device _____ saved millions of lives worldwide.
21. Volvo was the car-maker _____ first offered the modern seat belt.
22. He was born in a country _____ engineering and innovation are highly valued.
23. The gold medal, _____ Bohlin received in 1995, was from the Royal Swedish Academy.

Questions 24–28: Each sentence has ONE grammatical error. Find it and write the corrected sentence.

24. The invention of seat belts has helped people since many years ago. → _____
25. Safety technology did not wore seat belts until the law changed. → _____
26. Many engineers who / that work in this field is well-known. → _____
27. Car safety has continued to improve for forty years. ✓ (This sentence is CORRECT — write 'Correct' as your answer)
28. The factory makes seat belts _____ / that was started by Bohlin's company.

Questions 29–33: Combine the two sentences using a relative clause.

29. Nils Bohlin was a Swedish engineer. He invented the modern seat belt. → _____

30. The government gave a patent. The patent protected the invention from copying. → _____
31. Volvo shared the design with other car-makers. The design belonged to Nils Bohlin. → _____
32. He visited a library. He borrowed books about inventions from the library. → _____
33. Edward Claghorn was the first American to receive a seat belt patent. He was from New York. → _____

Questions 34–36: Complete each sentence with the correct tense and relative pronoun.

34. While some people do not like seat belts, they still wear them because the law _____. (require → present) (*)
35. The engineer _____ design changed car safety forever _____ (give) a patent by the government. (whose / was given) (*)
36. The car company _____ (share) the seat belt design in 1959 _____ one of the most important decisions in safety history. (*)

IV. QUESTIONS FOR WRITING (5 TASKS)

Task 1: Word Ordering (Sắp xếp từ thành câu hoàn chỉnh)

Rearrange the words to make a correct sentence: safe / seat belts / keep / in / us / cars /

Answer:

Task 2: Sentence Completion (Hoàn thành câu)

Complete the sentences with your own information: 1. I always wear a seat belt when ... 2. Car safety is important because ...

Answer:

Task 3: Translation (Dịch câu)

Translate the sentences from Vietnamese into English: 1. Kỹ sư người Thụy Điển đã phát minh ra dây đai an toàn mới. 2. Chúng ta phải luôn luôn thắt dây an toàn trong ô tô.

Answer:

Task 4: Short description of an invention

Read the invention facts below and write two simple sentences to describe it: Invention: Three-point seat belt / Inventor: Nils Bohlin (Swedish engineer) / Year: 1959 / Effect: Saves many lives

Answer:

Task 5: Guided Email Invite (Viết email ngắn)

(*) You want to go to a science exhibition about famous inventions. Write a short email (30-40 words) to invite a friend. Ask them if they can go this Sunday.

To: Subject:

.....

.....
