

DAILY PRACTICE: DAY 20260626 - HISTORY OF INVENTIONS*(Level: Reading B1 - Writing A1)*

Student Name:

Time Allowed: 50 mins

WARM-UP / KHỞI ĐỘNG**Answer the following questions in Vietnamese or English:**

1. Bạn có thường xuyên đeo dây đai an toàn khi ngồi trên ô tô không? Vì sao việc này lại quan trọng?
2. Bạn có biết ai là người đã phát minh ra dây đai an toàn hiện đại không?
3. Theo bạn, một phát minh thành công cần có những yếu tố gì?

I. READING PASSAGE**Safety Science: The Stories Behind Seat Belts and Kevlar**

Most cars have seat belts as part of their equipment. Seat belts protect drivers and passengers in case of accident. They also reduce the effect of a crash on the body. Safety experts estimate that the restraining devices save thousands of lives a year in the United States alone. Worldwide, some experts, say the devices have protected up to a million people.

The first seat belt was said to have been created in the eighteen hundreds by George Cayley of England. He is remembered for many inventions, especially for early “flying machines.”

The United States first recognized the invention of an automobile seat belt in eighteen forty-nine. The government gave a patent to Edward J. Claghorn of New York City so that others would not copy his invention. Claghorn called the device a Safety-Belt. It was said to include hooks and other attachments for securing the person to a fixed object.

Other inventors followed with different versions of the seat belt. But more than one hundred years passed before the current, widely used seat belt was developed. It resulted from the work of a Swedish engineer, Nils Bohlin. His three-point, lap and shoulder seat belt first appeared on cars in Europe fifty years ago.

At the time, most safety belts in cars crossed the body over the abdomen. A buckle held the restraints in place. But the position of the buckle often caused severe injuries in bad crashes.

Nils Bohlin recognized that both the upper and lower body needed to be held securely in place. His invention contained a cloth strap that was placed across the chest and another strap across the hips. The design joined the straps next to the hip.

Volvo was the first automobile manufacturer to offer the modern seat belt as a permanent addition to its cars. It also provided use of Nils Bohlin’s design to other car-makers.

The Swedish engineer won many honors for his seat belt. He received a gold medal from the Royal Swedish Academy of Engineering Sciences in nineteen ninety-five. He died in Sweden in two thousand two.

II. IELTS READING QUESTIONS (13 QUESTIONS)

Questions 1–5: Do the following statements agree with the information given in the Reading Passage? Write:

- TRUE** if the statement agrees with the information
FALSE if the statement contradicts the information
NOT GIVEN if there is no information on this

1. Safety experts believe seat belts save thousands of lives annually in the United States.
2. George Cayley created the first seat belt in the nineteenth century.
3. Edward J. Claghorn was a government officer who gave patents to inventors.
4. Nils Bohlin's three-point seat belt was first used in cars in the United States.
5. Nils Bohlin received financial support from the Swedish government for his work.

Questions 6–9: Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

6. Early seat belts in cars crossed the passenger's body over the _____.
7. Nils Bohlin designed a seat belt that secured both the _____ body in place.
8. _____ was the first car manufacturer to use the modern seat belt permanently.
9. In 1995, Nils Bohlin was awarded a _____ by the Royal Swedish Academy.

Questions 10–13: Choose the correct letter, A, B, or C.

10. What did safety experts note about early car seat belts with buckles?
 - A. They were very comfortable for long trips.
 - B. They could cause severe injuries during accidents.
 - C. They were too expensive for most people to buy.
11. Nils Bohlin's three-point seat belt design was unique because it:
 - A. used hooks to attach the person to a fixed object.
 - B. was made of bulletproof Kevlar material.
 - C. held both the chest and hips securely using two straps.
12. (*) What does Volvo's action of providing Nils Bohlin's design to other car-makers suggest?
 - A. Volvo wanted to help other companies make safer cars.
 - B. Volvo could not afford to manufacture seat belts.
 - C. The Swedish government forced Volvo to share the design.
13. (*) Which of the following is the most suitable title for this passage?
 - A. The Evolution of Flying Machines in England
 - B. How Nils Bohlin Changed Car Safety Forever
 - C. The History of Patents in the United States

III. QUESTIONS FOR GRAMMAR (30 QUESTIONS)

Questions 14–23: Choose the correct letter, A, B, or C.

14. Edward J. Claghorn, _____ lived in New York, received a patent for the seat belt in 1849.
 - A. which
 - B. who
 - C. whose

15. Volvo _____ the three-point seat belt a standard feature in 1959.
A. has made B. made C. makes
16. Safety experts _____ that seat belts have saved up to a million lives since their invention.
A. estimated B. have estimated C. estimate
17. The library, _____ has a quiet study room, is open until 8 PM.
A. which B. who C. where
18. Yesterday, I _____ a documentary about the history of cars.
A. have watched B. watched C. watch
19. In the past, seat belts crossed the abdomen, _____ often caused injuries in crashes.
A. who B. that C. which
20. Since 2010, car safety standards _____ significantly.
A. improved B. have improved C. improve
21. We have a lot of books about science, _____ we don't have many about history.
A. while B. whereas C. but
22. Nils Bohlin was an engineer _____ worked for Volvo.
A. who B. which C. whose
23. Last week, the school _____ a new safety campaign.
A. has launched B. launched C. launches

Questions 24–33: Fill in each blank with the correct form of the verb in parentheses or a suitable relative pronoun / conjunction.

24. The seat belt (invent) _____ in the 19th century.
25. Nils Bohlin (work) _____ for Volvo for many years before he retired.
26. Scientists (develop) _____ many new materials since Kevlar was invented.
27. The city library is very large, _____ the school library is quite small.
28. Yesterday, the driver (not wear) _____ his seat belt during the accident.
29. The scientist _____ invented Kevlar was Stephanie Kwolek.
30. Since Nils Bohlin's death in 2002, car safety (continue) _____ to improve.
31. This is the car _____ was fitted with the first three-point seat belt.
32. Volvo (make) _____ the design free for other car manufacturers fifty years ago.
33. He (not see) _____ the safety video yet.

Questions 34–43: Underline the grammatical error in each sentence and write the correct version next to it.

34. (*) Nils Bohlin, which was a Swedish engineer, developed the three-point seat belt. _____
35. The government has gave a patent to Claghorn in 1849. _____
36. Volvo has shared the seat belt design in 1959. _____
37. (*) The seat belt, that is widely used today, was invented by Nils Bohlin. _____

38. She has worked at the chemical company since forty years. _____
39. Yesterday, the police officer has stopped the car because the driver didn't wear a seat belt. _____
40. (*) Nils Bohlin was the man who design was chosen by Volvo. _____
41. This is the library where I borrow books from. _____
42. Volvo has been the first car company to make the seat belt standard. _____
43. (*) While some people do not like seat belts, but they still wear them for safety. _____

IV. QUESTIONS FOR WRITING (5 TASKS)

Task 1: Word Ordering (Sắp xếp từ thành câu hoàn chỉnh)

Rearrange the words to make a correct sentence:

safe / seat belts / keep / in / us / cars / .

Answer:

Task 2: Sentence Completion (Hoàn thành câu)

Complete the sentences with your own information:

1. I always wear a seat belt when
2. Car safety is important because

Task 3: Translation (Dịch câu)

Translate the sentences from Vietnamese into English:

1. Kỹ sư người Thụy Điển đã phát minh ra dây đai an toàn mới.

Answer:

2. Chúng ta phải luôn luôn thắt dây an toàn trong ô tô.

Answer:

Task 4: Short Description (Mô tả ngắn)

Read the invention facts below and write two simple sentences to describe it:

- Invention: Three-point seat belt
- Inventor: Nils Bohlin (Swedish engineer)
- Year: 1959
- Effect: Saves many lives

Sentence 1:

Sentence 2:

Task 5: () Guided Email Invite (Viết email ngắn)*

You want to go to a science exhibition about famous inventions. Write a short email (30–40 words) to invite a friend. Ask them if they can go this Sunday.

To: Subject:

.....

.....

.....

.....
